## 🪪 SUMMARY

Results-driven DevOps Engineer with expertise in automating infrastructure, optimizing CI/CD pipelines, and managing cloud-native deployments. Proven track record in reducing deployment times, enhancing system reliability, and streamlining operations through tools like Docker, Kubernetes, Terraform, and AWS. Skilled in monitoring, scripting, infrastructure as code, and ensuring high availability in dynamic environments.

## 🧠 SKILLS

- Continuous Integration and Deployment (CI/CD)
- Infrastructure as Code (IaC)
- Cloud Computing (Azure/AWS)
- Containerization (Docker, Kubernetes)
- Monitoring (Prometheus, Grafana)
- Scripting and Automation (Python, Bash, PowerShell)
- Version Control (Git)
- Networking and Security
- Database Management (MySQL)
- Operating Systems (Linux, Windows)

## 💼 EXPERIENCE

### DEVOPS ENGINEER, CLOUD SOLUTIONS

04/2024
- Containerization and Orchestration
- Cloud Services Management
- Monitoring and Logging
- CI/CD

### PSP MANAGER, MARK & PROOF

04/2023
- Selecting and integrating PSPs into platforms
- Monitoring payment performance
- Ensuring compliance with regulations
- Handling payment failures and disputes

## 🎓 EDUCATION

**DevOps course at Mate-academy**

**Cisco CCNA**

**UNIX and LINUX system administration handbook**
